For detail schedule go to the [link](#)

Scientific writing-useful for writers

who need to report their research work

As an academic writer, you are expected to be critical of the sources that you use!

Do you know analyze the scientific text???

means that you examine a text in detail and discuss the components and parts of a text and talk about how they interact with each other.

What sources should I use for researching
scientific information on the web?

Literature review, what is it?

Define the subject of the research in keywords?

When collecting and organizing your literature,
ask yourself: how does this relate to my study?

Are you familiar with this theme...be with us at
proposed schedule

Good luck!!!

The online course will be organized on MS Teams
platform. All our students and interested researchers,
teachers are welcome to join through the link which will
be available on the websites of our faculties.

You are all welcome!!!!

SCIENTIFIC WRITING ONLINE COURSE
